

Publications - Richard J. O'Connell

Viscosity of the Earth, D. L. Anderson and R. J. O'Connell, *Geophys. J. R. astr. Soc.* **14**, 287-295, 1967.

Dynamics of the motion of a phase change boundary to changes in pressure, R. J. O'Connell and G. J. Wasserburg, *Rev. Geophys.* **5**, 329-410, 1967.

Critique of the paper by W. J. Van de Lindt, 'Movement of the Mohorovičić discontinuity under isostatic conditions,' R. J. O'Connell, *J. Geophys. Res.* **73**, 6604-6607, 1968.

Dynamic response of phase boundaries in the Earth to surface loading, I; Viscosity of the lower mantle, II, R. J. O'Connell, PhD Thesis, California Institute of Technology, 1969.

Rheology of the mantle, R. J. O'Connell, *EOS, Trans. Am. Geophys. Un.* **52**, 140-142, 1971.

Pleistocene glaciation and viscosity of the lower mantle, R. J. O'Connell, *Geophys. J. R. astr. Soc.* **23**, 299-327, 1971.

Dynamics of submergence and uplift of a sedimentary basin underlain by a phase-change boundary, R. J. O'Connell and G. J. Wasserburg, *Rev. Geophys. Space Phys.* **10**, 335-368, 1972.

Equation of state of NaCl: Ultrasonic measurements to 8 kbar and 800°C and static lattice theory, H. Spetzler, C. G. Sammis and R. J. O'Connell, *J. Phys. Chem. Solids* **33**, 1727-1750, 1972.

Effect of stress induced anisotropy and porosity on elastic properties of polycrystals, H. Spetzler, E. Schreiber and R. J. O'Connell, *J. Geophys. Res.* **77**, 4938-4944, 1972.

Seismic velocities in dry and saturated cracked solids, R. J. O'Connell and B. Budiansky, *J. Geophys. Res.* **79**, 5412-5426, 1974.

Elastic moduli of a cracked solid, B. Budiansky and R. J. O'Connell, *Int. J. Solids Structures* **12**, 81-97, 1976.

The effects of mantle phase changes on postglacial rebound, R. J. O'Connell, *J. Geophys. Res.* **81**, 971-974, 1976.

Reply (to comment by W. Bruner on 'Seismic velocities in dry and saturated cracked solids'), R. J. O'Connell and B. Budiansky, *J. Geophys. Res.* **81**, 2577--2578, 1976.

Application of normal-mode theory to calculation of changes in the Earth's moment of inertia due to earthquakes, A. M. Dziewonski and R. J. O'Connell, in: *Semiannual Technical Summary, Seismic Discrimination* (MIT, Lincoln Laboratory, March 1976).

Excitation of the Chandler wobble by large earthquakes, R. J. O'Connell and A. M. Dziewonski, *Nature* **262**, 259-262, 1976.

The elastic properties of composite materials, J. P. Watt, G. F. Davies and R. J. O'Connell,

Rev. Geophys. Space Phys. **14**, 541-563, 1976.

On the scale of mantle convection, R. J. O'Connell, *Tectonophysics* **38**, 119-136, 1977.

Large-scale heterogeneities in the lower mantle, A. M. Dziewonski, B. H. Hager and R. J. O'Connell, *J. Geophys. Res.* **82**, 239-255, 1977.

Transducer and bond phase shifts in ultrasonics and their effects on measured pressure derivatives of elastic moduli, G. F. Davies and R. J. O'Connell, in: *High-Pressure Research: Applications in Geophysics* (M. H. Manghnani and S. Akimoto, eds.) Academic Press, New York, 533-562, 1977.

Physical properties of the Earth's interior, R. J. O'Connell, T. J. Shankland and R. C. Liebermann, in: *Geodynamics: Progress and Prospects* (C. L. Drake, ed.) American Geophysical Union, Washington, DC, 1976.

Viscoelastic properties of fluid-saturated cracked solids, R. J. O'Connell and B. Budiansky, *J. Geophys. Res.* **82**, 5719-5739, 1977.

Measures of dissipation in viscoelastic media, R. J. O'Connell and B. Budiansky, *Geophys. Res. Lett.* **5**, 5-8, 1978.

Subduction zone dip angles and flow driven by plate motion, B. H. Hager and R. J. O'Connell, *Tectonophysics* **50**, 111-133, 1978.

Mixed-oxide and perovskite-structure model mantles from 700-1200 km, J. P. Watt and R. J. O'Connell, *Geophys. J. R. astr. Soc.* **54**, 601-630, 1978.

Kinematic models of large-scale flow in the Earth's mantle, B. H. Hager and R. J. O'Connell, *J. Geophys. Res.* **84**, 1031-1048, 1979.

Comment (on 'Elastic moduli of two-component systems' by A. K. Chatterjee, A. K. Mal and L. Knopoff), B. Budiansky and R. J. O'Connell, *J. Geophys. Res.* **84**, 5687-5688, 1979.

Creep and fracture in the moon, R. A. Verrall and R. J. O'Connell, *Lunar and Planet. Sci. X*, 1265-1267, 1979.

An experimental investigation of the Hashin-Shtrikman bounds on two-phase aggregate elastic properties, J. P. Watt and R. J. O'Connell, *Phys. Earth Planet. Int.* **21**, 359-370, 1980.

Lithospheric thickening and subduction, plate motions and mantle convection, B. H. Hager and R. J. O'Connell, in: *Physics of the Earth's Interior* (Proceedings of the International School of Physics 'Enrico Fermi'; course 78), A. M. Dziewonski and E. Boschi, eds., North Holland, 464-492, 1980.

On the thermal state of the Earth, R. J. O'Connell and B. H. Hager, in: *Physics of the Earth's Interior* (Proceedings of the International School of Physics 'Enrico Fermi'; course 78), A. M. Dziewonski and E. Boschi, eds., North Holland, 270-317, 1980.

Rheology, plate motions and mantle convection, B. H. Hager and R. J. O'Connell, in:

Mechanics of Plate Tectonics and Continental Drift (P. A. Davies and S. K. Runcorn, eds.), Academic Press, 199-223, 1980.

Bulk dissipation in heterogeneous media, B. Budiansky and R. J. O'Connell, in: *Solid Earth Geophysics and Geotechnology* (S. Nemat Nasser, ed.), American Society of Mechanical Engineers, New York, 1-10, 1980.

A simple global model of plate dynamics and mantle convection, B. H. Hager and R. J. O'Connell, *J. Geophys. Res.* **86**, 4843-4867, 1981.

Geophysical constraints on partial melt in the upper mantle, T. J. Shankland, R. J. O'Connell and H. S. Waff, *Rev. Geophys. Space Sci.* **19**, 394-406, 1981.

Bulk attenuation in a polycrystalline Earth, D. Heinz, R. Jeanloz and R. J. O'Connell, *J. Geophys. Res.* **87**, 7772-7778, 1982.

Subduction, back-arc spreading and global mantle flow, B. H. Hager, R. J. O'Connell and A. Raefsky, *Tectonophysics* **99**, 165-189, 1983.

Bulk thermoelastic attenuation of composite materials, B. Budiansky, E. E. Sumner, Jr. and R. J. O'Connell, *J. Geophys. Res.* **88**, 10343-10348, 1983.

A viscoelastic model of anelasticity of fluid saturated porous rocks, R. J. O'Connell (Proceedings of the Physics and Chemistry of Porous Media Symposium, October 1983), American Institute of Physics Spec. Publ., 166-175, 1984.

Non linear generation of acoustic beams in crystalline rock, P. A. Johnson, T. J. Shankland, R. J. O'Connell and J. N. Albright, *J. Geophys. Res.*, **92**, 3597-3602, 1987.

A continuum model of continental deformation above subduction zones: Application to the Andes and the Aegean, S. Wdowinski, R. J. O'Connell and P. C. England, *J. Geophys. Res.*, **94**, 10331-10346, 1989.

On the choice of boundary conditions in continuum models of Continental Deformation, S. Wdowinski and R. J. O'Connell, *Geophys. Res. Lett.*, **17**, 2413-2416, 1990.

A benchmark comparison of numerical methods for infinite Prandtl number thermal convection in two-dimensional cartesian geometry, B. J. Travis, C. Anderson, J. Baumgardner, C. W. Gable, B. H. Hager, R. J. O'Connell, P. Olson, A. Raefsky and G. Schubert *Geophys. Astrophys. Fluid Dynam.*, **55**, 137-160, 1990.

Toroidal-poloidal partitioning of lithospheric plate motions, R. J. O'Connell, C. W. Gable and B. H. Hager, in *Glacial Isostasy, Sea Level and Mantle Rheology*, edited by R. Sabadini and K. Lambeck, Kluwer Academic Publishers, Dordrecht, 535-551, 1991.

Convection in three dimensions with surface plates: Generation of toroidal flow, C. W. Gable, R. J. O'Connell and B. J. Travis, *J. Geophys. Res.*, **96**, 8391-8405, 1991.

Deformation of the central Andes (15-27 S) derived from a flow model of subduction zones, S. Wdowinski and R. J. O'Connell, *J. Geophys. Res.*, **96**, 12245-12255, 1991.

Tomography, the geoid and plate motion, C. W. Gable and R. J. O'Connell, *Reviews of Geophysics*, **supplement**, 776-782, April, 1991.

Ablative subduction: A two-sided alternative to the conventional subduction model, W. C. Tao and R. J. O'Connell, *J. Geophys. Res.*, **97**, 8877-8904, 1992.

Toroidal-poloïdal partitioning of plate motions since 120 Ma, C. Lithgow-Bertelloni, M. A. Richards, Y. Ricard, R. J. O'Connell and D. C. Engebretson, *Geophys. Res. Lett.*, **20**, 375-378, 1993.

Deformation of a weak subducted slab and variation of seismicity with depth, W. C. Tao and R. J. O'Connell, *Nature*, **361**, 626-628, 1993.

The interaction of plume heads with compositional discontinuities in the Earth's Mantle, M. Manga, H. A. Stone and R. J. O'Connell, *J. Geophys. Res.*, **98**, 19979-19990, 1993.

Marginal Stability of a Layered Fluid with Mobile Surface Plates, Buffett, B., C. W. Gable and R. J. O'Connell, *J. Geophys. Res.*, **99**, 19,885-19,900, 1994.

Continent-ocean chemical heterogeneity in the mantle based on seismic tomography, A.M. Forte, A.M. Dziewonski and R. J. O'Connell, *Science*, **268**, 386-388, 1995.

The tectosphere and postglacial rebound, M. Manga and R. J. O'Connell, *Geophys. Res. Lett.*, **22**, 1949-1952, 1995.

Thermal and Chemical Heterogeneity in the Mantle: A Seismic and Geodynamic Study of Continental Roots, A. M. Forte, A. M. Dziewonski, and R. J. O'Connell, *Phys Earth Planet. Int.*, **92**, 45-55, 1995.

Change of the Earth's rotation axis inferred from advection of mantle density heterogeneities, B. Steinberger and R.J. O'Connell, *Nature*, **387**, 169-173, 1997.

Advection of plumes in mantle flow; implications for hotspot motion, mantle viscosity and plume distribution, B. Steinberger and R. J. O'Connell, *Geophys. J. Int.*, **132**, 412-434, 1998.

Thermal structure, thickness and composition of continental lithosphere, R. L. Rudnick, W. F. McDonough and R. J. O'Connell, *Chemical Geology*, **145**, 395-411, 1998.

On Maxwell singularities in postglacial rebound, L. Boschi, J. Tromp and R. J. O'Connell, *Geophys. J. Int.*, **136**, 492-498, 1999.

Thermal constraints on the survival of primitive blobs in the lower mantle", Th. W. Becker, J. B. Kellogg and R. J. O'Connell, *Earth Planet. Sci. Lett.*, **171**, 351-365, 1999.

The development of subduction in the upper mantle: insights from experimental and laboratory experiments, Th. W. Becker, C. Faccenna, R. J. O'Connell, and D. Giardini, *J. Geophys. Res.*, **104**, 15207-15226, 1999.

Effects of mantle flow on hotspot motion, Bernhard Steinberger and R. J. O'Connell, in *The History and Dynamics of Global Plate Motions* ed. by Mark A. Richards, Richard G.

Gordon, and Rob D. vander Hilst, *Geophysical Monograph Series*, **121**, 377-398, American Geophysical Union, 2000.

Predicting plate velocities with mantle circulation models, T. W. Becker and R. J. O'Connell, *Geochemistry, Geophysics, Geosystems*, **2**, 2001GC000171, 2001. The convective mantle flow signal in rates of true polar wander, B. Steinberger and R. J. O'Connell, in *Ice Sheets, Sea Level and the Dynamic Earth*, edited by J. X. Mitrovica, and L. L. A. Vermeersen, *Geodynamics Series*, **29**, 233-256, AGU, Washington, D. C., 2002. Modeling the distribution of isotopic ratios in geochemical reservoirs, J. B. Kellogg, R. J. O'Connell and S. B. Jacobsen, *Earth Planet. Sci. Lett.*, **204**, 183-202, 2002.
